WHERE SEA MEETS RAIL
INTERMODAL SOLUTIONS FOR POLAND

MSC's intermodal offering in Poland represents a modern approach to logistics, integrating sea, rail, and road transport into one seamless and efficient system. With a well-developed network of connections and strategically located terminals across key regions of the country, MSC delivers solutions that enhance supply chain reliability while helping to reduce operational costs and CO_2 emissions.

Our intermodal network in Poland

MSC operates a growing network of strategic inland connections that ensure efficient access to key industrial regions:

- Slawkow – serving Upper Silesia and Lesser Poland
- Katy Wroclawskie – serving Lower Silesia
- Debica – serving the Subcarpathia

These hubs enable fast and reliable connections between seaports and inland destinations, supporting daily logistics flows across Poland and beyond.

Key benefits of MSC intermodal solutions in Poland

- Strategic location of inland terminals across key industrial regions
- Direct access to the European rail network
- High operational capacity and service flexibility
- Efficient handling of 20' containers and heavy cargo

COMPREHENSIVE CUSTOMS SUPPORT

MSC Poland provides full customs support, including clearance and T1 transit documents, to ensure fast and compliant crossborder transport across Europe. All procedures follow AEO standards, ensuring high security and efficiency.
