## DEMURRAGE/DETENTION (COMBINED)

### What is Demurrage/Detention?

Demurrage/Detention, also known as container rent, is the charge the Ocean Carrier applies for the use of containers after the applicable free time has expired, both inside and outside the port area.

### When does Demurrage/Detention start?

Demurrage/Detention free days begin on the date the container enters the customer's responsibility period:

- **Export cargo:** From the day the empty container is picked up from the designated depot/terminal.
- **Import cargo:** From the day the container is discharged from the vessel.

The relevant event date can be verified via the [MSC Container Tracker](#). The pickup/discharge date counts as the first free day.

### How are Demurrage/Detention free days and billing days calculated?

Demurrage/Detention is calculated in consecutive calendar days, including Saturdays, Sundays, and public holidays.

### When does Demurrage/Detention stop?

Demurrage/Detention ends when the container is returned to the carrier's control:

- **Export cargo:** When the container is loaded onto the scheduled vessel. In case of vessel delays, the proforma loading date will apply and stop the calculation.
- **Import cargo:** When the empty container is gated in at the designated depot advised by MSC Denmark.

# STORAGE

## What is Storage?

Storage is quay rent charged by the Terminal Operator for storing full containers in the terminal yard. The Terminal Operator charges the Ocean Carrier, who in turn passes the cost on to the customer once the applicable free time has expired.

## When does Storage start?

Storage free days always begin on the date the container enters the terminal storage period:

- **Import cargo:** From the day the container is discharged from the vessel.
- **Export cargo:** From the day the container is gated in full at the terminal.

The relevant event date can be verified via the [MSC Container Tracker](#). The discharge/gate-in day counts as the first free day.

## How are Storage free days and billing days calculated?

Storage is calculated in consecutive calendar days, including Saturdays, Sundays, and public holidays.

## When does Storage stop?

Storage ends when the container leaves the terminal storage period:

- **Import cargo:** When the full container is gated out of the terminal.
- **Export cargo:** When the container is loaded onto the scheduled vessel. In case of vessel delays, the proforma loading date will apply and stop the storage calculation.
